Seafood fans have plenty to love among the latest restaurant openings in Miami, including a brand new oyster spot and a French bistro offering Grand Plateaus of lobster and mussels. Meanwhile, a beloved sushi spot expands to a new Design District address, and a beloved beachside destination unveils its new expansion. If fish, bivalves and crustaceans aren't your jam, you're still in luck: The steakhouse known as Miami's "buzziest" has opened a new location with loads of creative beef options to sink your teeth into.

Michael Beltran's new seafood-focused venture is only the first in a two-part concept, with Eva's promised Mediterranean menu poised to join this intimate space later this fall. For now, the Oyster Bar boasts everything from both East and West Coast oysters on the half-shell to conch salad, not to mention warm small plates like clam dip and lobster rolls. The beverage program's cocktails were designed with seafood in mind, with bright, refreshing offerings like the Rye Tai with rye whiskey, pineapple, orgeat, lemon and angostura bitters. And don't miss a spiked snow cone for dessert!
